DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Sunday, 02 June 2024 at 04:37 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Northerly winds will help to keep air pollution at Low levels across the majority of the UK. There may be isolated pockets of Moderate air pollution in places. Additionally, there is a chance for gas from the recent Icelandic volcanic eruption to be detected in air passing over the southwest of the UK today, in particular across South Wales and parts of Devon/Cornwall.

Tomorrow: Generally Low levels of air pollution are expected tomorrow, with just the odd isolated pocket of Moderate air pollution possible in places.

Outlook: Predominantly Low levels of air pollution are expected. However, some pockets of Moderate air pollution may occur.
